- Photoshop
- JavaScript
- MS Office

RESUME

I am a recent graduate and have no work experience, but I like to research and develop myself. I am looking for a job in a technician, engineer or hybrid staff where I can improve myself in the field I graduated from. If necessary, I also believe that I can acquire new competencies by improving myself. Thank you for your interest in my resume and cover letter. I would love to attend a face to face interview and talk in detail about the job and its suitability for my skills.

EXPERIENCE

Medical Petty Officer

From 2021 | TSK (Reserve Petty Officer)

I served as a member of the control organization.

Biomedical Technician

From 2017 | Sky Medikal (Volunteer Intern)

At Sky medical, I had experience mainly on life support devices. I am happy to have crossed paths with this family, which has a very good energy. I left this beautiful company to continue my university education.

Electrical - Electronics Technician

From 2014 to 2015 | Sky Elektronik (Intern and Employee)

At Sky Elektronik, I gained experience in the installation, maintenance and repair of sound, lighting and imaging systems. After my internship, I left the company where I worked as an employee for a while for my university education.

CERTIFICATES

Clinical Support Staff (KDE) | TITCK - SAUSEM

The training covers Legislation training, Medical ethics training, working training in sterile service fields and Radiation safety training for those who will work in the field in the biomedical branch.

Sales Promotion Person (STE) | TITCK - SAUSEM

The training covers Legislation training and Medical ethics training for those who will work in the field in the biomedical branch.

English Language Education (A1, Cont.) | BUSUU

My English language learning efforts were interrupted from time to time. I have not yet found a language learning method where I can spend little time in my daily life and get high efficiency. However, I haven't given up.

LANGUAGES

- English (A1)
- Turkish (Main)
